

### REMARKS

In response to the restriction requirement dated June 24, 2009, Applicants elect for prosecution the invention of Group II, i.e., claims 33-39, drawn to a treatment method comprising administration of a composition containing a molecule that includes a particular oligosaccharide. This election is made without traverse.

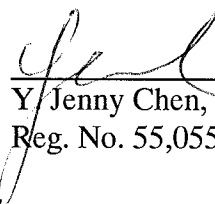

Note that claim 33 has been amended to more particularly and specifically point out the subject matter that Applicants deem as their invention. Support for this amendment can be found in original claim 1 and in the specification at page 13, lines 12-14 and at page 32, lines 1-2.

Further, Applicants have added new claims 58-63, support for which appears in original claims 2, 3, 4, and 10. All of these new claims depend from claim 33, directly or indirectly, and cover the same subject matter as claim 33. Indeed, like claim 33, these new claims are also drawn to a method for treating or reducing the risk of infection with a composition containing a sugar-moiety-including molecule. Applicants therefore respectfully request that the new claims be examined together with elected claims 33-39 in the present application.

No fee is believed to be due. Please apply any other charges or credits to Deposit Account No. 50-4189, referencing Attorney Docket No. 50051-002US1.

Respectfully submitted,

Date: 7/24/09
